OADTL (Provided by the Digital Theological Library)

The mission of Open Access Digital Theological Library (OADTL) is to curate high-quality content in religious studies and related disciplines from publisher websites, institutional repositories, scholarly societies, archives, and stable public domain collections. The OADTL uses the world's most advanced integrated library system (ILS) for cataloging and discovery. This system, OCLC's WorldShare, makes content easily discoverable and retrievable. The OADTL is staffed by professional librarians and curates content without regard for theological or confessional perspective. It is hoped that the increased access to high-quality religious studies content will serve scholars and students of religion.
